Connectivity with Reliability

Hello,

I am Birpal with Expertz Internet services. We're an internet provider company that specializes in setting up wired/wireless commercial internet connections and business servers for Microsoft Teams and Skype.

Our core strength lies in the fact that the services we have provided in the last three years of existence require minimal support and maintenance over the years of operation. Our setup is mostly **plug-n-play** and does not require any major downtime in our client's operations. To top it up, the entire system is supported by 128-bit encryption aided with **Cisco ASA** firewall system

We've worked with companies like DataCentric, ISM, Convergent Systems to improve their business productivity with an enhanced sense of security.

If you have a minute or two to learn more about us, you can visit us here at [www.expertzinternet.com](http://www.expertzinternet.com). If I don't hear from you, I will reach out to you via phone later in the week.

Thank you,
